

Orbis

Premium Manual Valve Set

The Orbis valve set is made from solid brass and features a Bakelite wheel control handle. An industrial-inspired design that truly gives a modernist edge to your cast iron radiator. Influenced by vintage French radiator design, the Orbis has a simple manual valve control that gives you the option to adjust your radiator temperature. It is suitable for all types of cast iron radiators.

The Orbis is an angled valve set that fits 1/2" BSP bush fittings and pipe widths.
