

Traditio

Premium Manual Valve Set

Handmade and unique to Vintage Cast Iron Radiators. The Traditio valve set is made from solid brass and features a Bakelite control handle. The elegant contrast between the black lever and the remaining components of the valve makes it a must-have for an original traditional décor. It is suitable for all types of cast iron radiators.

With a reassuring weight and a vintage design, the traditional manual control gives you the option to set your radiator to the desired temperature.

The Traditio is an angled valve set that fits 1/2" BSP bush fittings and pipe widths.
